PROFESSIONAL SUMMARY

Entry-level Software Engineer with hands-on experience in Java, Spring Boot, and RESTful API development, and strong understanding of Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), and Microservices Architecture. Skilled in building scalable backend systems, integrating enterprise applications, and applying Agile. Passionate about developing high-quality, secure applications aligned with enterprise standards.

SKILLS

Languages: Java 17, JEE, JavaScript, HTML5, CSS3.

Tools & Platforms : Git, GitHub, Maven, Jenkins, Postman, IntelliJ IDEA, Eclipse, STS, VS Code

Frameworks & Technologies : Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security(JWT).

Microservices & Integration : REST APIs, Spring Cloud, Apache Kafka

Database: MySQL, PostgreSQL, JDBC.

Software Practices : Software Development Life Cycle (SDLC), Agile Methodology, Test-Driven Development (JUnit), Debugging.

Core CS Concepts : OOP, Operating Systems (Basics), Transaction Management, Multithreading, Collections, Exception Handling, SOLID Principles, dependency injection, aspect-oriented programming, inversion of control

Professional Experience

Webforge Technologies | Jun 2025 – Nov 2025

Software Engineer

- Developed and maintained RESTful APIs using Java and Spring Boot for enterprise applications
- Implemented exception handling, validation, and transaction management for robust backend systems. Applied Agile methodologies for sprint planning, development, and issue tracking
- Improved application performance and reliability through debugging and code optimization
- Collaborated with team members to deliver scalable and secure solutions

PROJECT

1) Data Workflow Automation Engine

Technologies: Java, Spring Boot, REST APIs, SQL, PostgreSQL.

- Designed a scalable workflow engine for data ingestion and processing pipelines
- Developed backend services to manage asynchronous job execution and workflow tracking
- Implemented robust error handling, logging, and retry mechanisms for reliability
- Optimized database interactions and improved data processing efficiency
- Integrated secure file transfer (SFTP) and reporting tools.

2) Academic Resource Management Platform

Technologies: Java, Spring Boot, REST APIs, SQL, PostgreSQL, Postman, Jenkins, React.js.

- Built a full-stack Student Management System using Spring Boot and React.js to streamline academic and administrative operations.
- Implemented JWT-based authentication and authorization with role-based access control (Admin, Trainer, Counselor, Student).
- Developed RESTful APIs for managing students, courses, batches, and enrollment workflows.
- Designed responsive dashboards with secure login, signup, and password reset functionality.
- Used Spring Security, Maven, and Docker to ensure scalable and secure application deployment.

EDUCATION

Bachelor of Engineering - 2022 – 2025 - ALARD College of Engineering, Pune
